

ScanoMed Translational Imaging

<http://www.scanomedtranslational.com>

## Bilateral Meetings

- Wednesday 10:40 h - 13:00 h
- Wednesday 14:00 h - 18:00 h

### Description

At ScanoMed Ltd. we are focusing on both patient care as a Nuclear Medicine Clinic and translational research from small animal pharmaceutical studies up to the clinical phase investigations. Our preclinical laboratory includes all four tomographic imaging technologies (CT, MRI, PET, SPECT) for small animal imaging (Mediso nanoScan) as well as ex vivo biodistribution equipment (Perkin Elmer). At the ScanoMed Nuclear Medicine Clinic clinical phase studies are running on the AnyScan SPECT/CT and PET/CT systems. Our team consists of professionals from a wide spectrum of research fields including medicine, biology, radiochemistry, physics and medical technology. We operate efficiently by weekly communications on the research projects, the tasks on demand and new scientific questions. The members of ScanoMed Translational Imaging Team regularly appear on scientific congresses of molecular imaging and nuclear medicine (e.g. EANM, SNM, WMIC) with oral and poster presentations.
