## Bilateral Meetings

- Wednesday 10:40 h - 13:00 h
- Wednesday 14:00 h - 18:00 h

### Description

CardiolD is a tech company founded in April 2014. The team is formed by various competencies coming from biomedical, programming, machine learning, electronics, hardware manufacturing to veterinary medicine, animal welfare, and business development. CardiolD's breakthrough technology has gained worldwide recognition, with several interested market technology suitors.

### Organization Type

Company

Areas of Activities

### Medical devices

### Information and Communication Technology

### Other

### Offer & Request

## Technology to process heart signals acquired from hands

We develop hardware and algorithms to process heart signals acquired from hands, layered on:

- Health and Wellbeing: non-intrusive heart monitoring enables the detection of multiple cardiac pathologies.
- Identity: the ECG is able to identify people. It's like a fingerprint, but using the heart signal.
- Drowsiness and fatigue: the heart can give an insight about person drowsiness and fatigue levels.

### Cooperation Offered

1. Technical co-operation
2. Research co-operation
3. License agreement
