Request

Consortium project on diabetes prevetion, monitoring and medical research

Evolute works in partnership with APDP, europe's largest diabetes association, developing integrated systems for physicians and other care providers, researchers and diabetics.
Together we are looking for technology IoT providers that could integrate with our systems to monitor vital signs and relevant parameters.

Keywords: monitor   glucose   IoT   integration   patient data
Cooperation Offered

1. Research co-operation
2. Technical co-operation

Cooperation Requested

1. Manufacturing agreement
2. Research co-operation

3. Technical co-operation

Offer

Data Centre and HPC Services for Clinical Research

Evolute's Data Centre is located in Lisbon and complies to European data protection directives. We offer over-the-top connection speed (put us on trial @ http://www.evolute.speedtest.net/) and processing units flexibility, High Performance Computing, over with an higly experienced team.

Keywords: data centre   HPC   High-performance computing
Cooperation Offered

1. Technical co-operation
2. Research co-operation

Offer

Systems development for personalised medicine and predictive medicine

Evolute collaborates with european universities and institutes on developing systems for personalised medicine and provides database infrastructure for medical research, as well as data pattern recognition for predictive medicine and offers to collaborate on akin projects

Keywords: personalised medicine   research databases   predictive medicine   IT   systems development   R&D   innovation
Cooperation Offered

1. Technical co-operation
2. Research co-operation

Offer

R&D&I on IT systems for chronic disease

Evolute works in partnership with APDP, europe's largest diabetes association, developing integrated systems for physicians and other care providers, researchers and diabetics.
We are well familiared with the specificities on chronic diseases such as Diabetes or CVD

Keywords: IT   system development   integration   chronic disease   R&D   innovation
Cooperation Offered

1. Technical co-operation
2. Research co-operation

Idea

Diabetes/CVD IoT

R&D&I on IoT and Big Data solutions for monitoring Diabetes/CVD patients, researching the disease and delivering real-time personalised medicine.

Keywords: IoT   Big data   Chronic disease   Diabetes   CVD   personalised medicine   real-time   monitor

Cooperation Offered

1. Technical co-operation
2. Research co-operation

Cooperation Requested

1. Technical co-operation
2. Research co-operation
3. Manufacturing agreement
4. Investment/Financing
